

# Hard to Beat...

## Absolutely Worldclass Solutions In Aviation Obstruction Markings...

As a technology conglomerate, we at Avaid's Technovators design, develop and manufacture a range of luminaires and lighting products including Aviation Obstruction Markings. In a little less than two decades, we've emerged as one of Asia's most trusted providers of Obstruction Warning solutions across the entire spectrum of aviation warning requirements. Solutions that have been deployed in aviation obstruction marking of Telecom and Cellular Towers, TV and Radio antennae towers, high rise power transmission cable posts and pylons, chimneys, cooling towers, sky scrapers and hills near airports.

Avaid's revolutionary R&D efforts have put it among the world's select few companies that offer the next generation warning lights, blending cutting edge LED and optics technologies available today and made it probably the only one with several unique competencies. Like designing and implementing solar powered warning lighting systems.

Our obstruction warning solutions come complete with products conforming to the most rigorous ICAO and FAA standards as well as worldclass project management capabilities, now proven across the telecom, power, construction, broadcast and several other domains.

Avaid's is privileged to unveil to you the same state-of-the-art products and solutions that have been delighting customers across the Gulf & the Middle East, Africa, East Asia and the Pacific Rim for the last twenty years. Come, let's have a glimpse of how Avaid's Technovators can make your structure aviation safe.
